ZM FASTENERS

ZM Fasteners Co., Ltd., established in 2007, we specialize in customizing non-standard screws, as well as CNC machining and automatic lathe machining of fasteners. Our production range includes:

Screws: We specialize in providing customized services to clients, manufacturing custom parts based on customer-provided drawings or samples. At the same time, we also produce screws that comply with DIN, ISO, ANSI, BS, and JIS standards.

Automatic Lathe Parts: We develop and manufacture various precision hardware parts such as shafts, pins, nuts, etc., with diameters ranging from 1.0 to 25mm and lengths below 250mm, based on customer drawings and requirements.

CNC Lathe Machining: Development and manufacturing of precision metal parts.

Our customized components are tailored to meet your exact specifications. For us, there is no "too big" or "too small". Regardless of the scale, we can provide fast delivery to meet your needs. The mission of ZM Fastener is to become a reliable partner that accompanies the growth of your business.

Screws

Automatic lathe machining fasteners

CNC machining fasteners

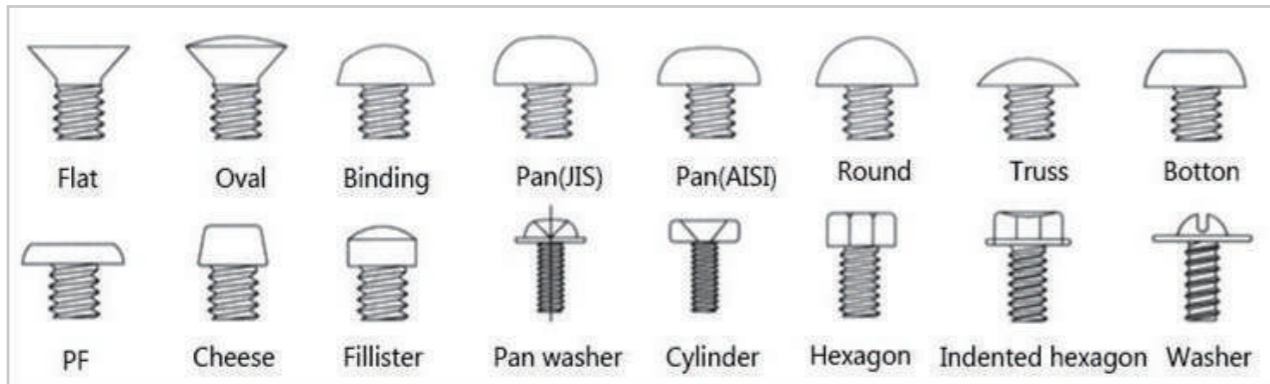

The types of screws we produce include:

① Categorized by production standards:

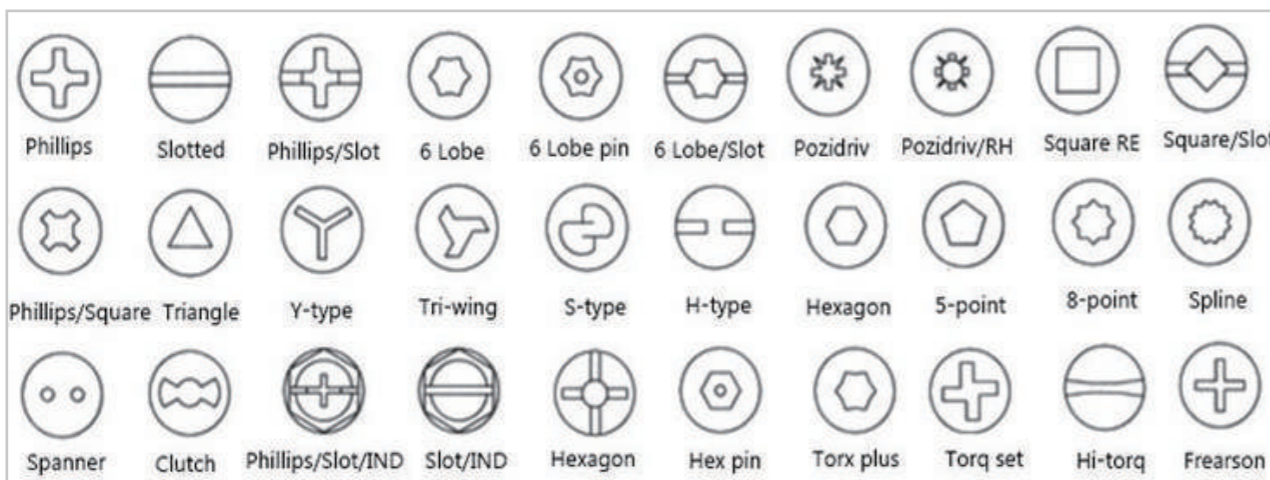

Customized non-standard screws (produced according to customer drawings) & ANSI, ISO, JIS, DIN, BSW standard.

② Head Types

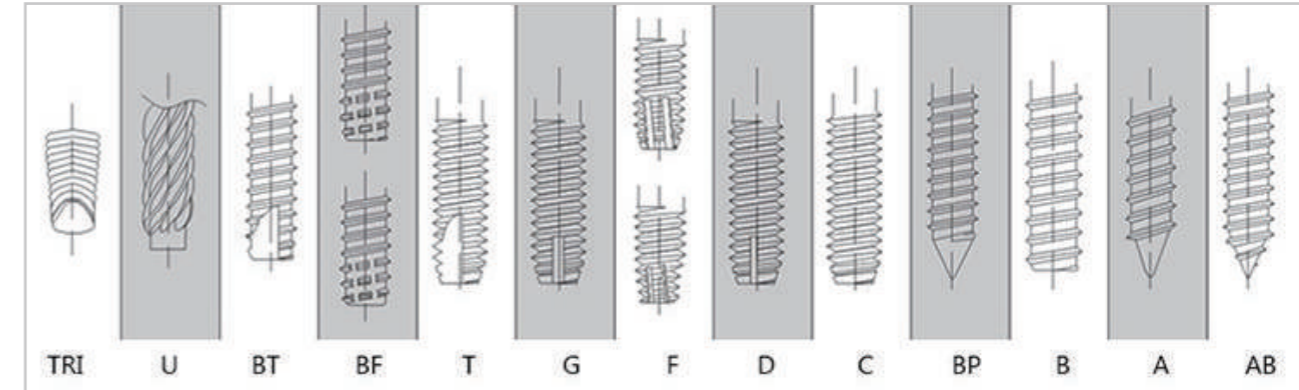

(The following are common head types, and special head types can be produced according to customer drawings)

③ Driver Types

④ Thread Types

⑤ Material Types

Low & medium carbon steel, alloy steel, copper, aluminum, antimony, stainless steel, etc.

⑥ Surface Finishing

ZINC (Zn) NICKEL (Ni) BRASS (Br) BLACK OXIDE (BK) CHROMATE (Cr) BLACK ZINC (BK-Zn)

Plating and corrosion resistance				
Common coating	Electroplating process	Salt spray test	Remark	Artificial Perspiration
Eco-friendly Nickel	Barrel	4-24h	Conventional nickel plating can only reach 4h salt spray test, and over-sealed oil can reach 24h	4h
Eco-friendly black nickel	Barrel	4-24h		4h
Eco-friendly white zinc	Barrel	24-48h	Conventional up to 24h, over-sealed oil up to 48h	24h
Eco-friendly color zinc	Barrel	24-48h		>48h
Eco-friendly blue zinc	Barrel	24-48h		>48h
Eco-friendly black zinc	Barrel	24-48h	Conventional only up to 4h, over-sealed oil up to 24h	>48h
Eco-friendly tin	Barrel	4-24h		>48h
Eco-friendly silver	Barrel	4-24h		>48h
Eco-friendly gold	Barrel	4-24h		>48h
PVD BLACK	Rack Plating	>24h		>48h

We develop and manufacture various precision hardware parts such as shafts, pins, nuts, etc., with diameters ranging from 1.0 to 25mm and lengths below 250mm, based on customer drawings and requirements.

Unleash Precision with Our CNC Machining Solutions!
As a leading hardware export factory, we specialize in CNC precision manufacturing. With cutting-edge technology and a skilled team, we deliver unrivaled precision and quality. Our versatile capabilities cater to various materials, ensuring tailored solutions for your needs. From intricate prototypes to large-scale production, we excel in delivering excellence. Experience seamless collaboration, timely delivery, and superior results. Trust our expertise to transform your concepts into reality. Contact us today to unlock the full potential of CNC precision machining and elevate your business to new heights.
